OBJECTIVE

Full-Stack Software Engineer with hands-on experience building secure FinTech platforms using Next.js, React, NestJS, and PostgreSQL. Experienced in e-wallet back-office systems, KYC workflows, API security, Keycloak/PKCE authentication, and AI multi-agent platform development.

WORK EXPERIENCE

Enabridge Co., Ltd., AI Software Engineer 07/2025 – 06/2026 | Bangkok
E-Wallet Platform (with Lightnet) — Full-Stack

- Led frontend development of the e-wallet back-office as a core contributor — built Partner, Wallet, KYC, Dashboard, and Fee-management modules in Next.js / TypeScript based on Figma, including Keycloak (PKCE) auth flow and client-side security hardening.
- Built backend partner-management APIs (top-up / withdraw / register) in NestJS with database transactions, balance reconciliation, and fee/limit configuration.
- Developed wallet & transaction services with multi-tenant data isolation, audit logging, and unit/regression + E2E tests.
- Built KYC back-office workflow (submission list, detail view, status tracking, provider-result display) with file validation and upload hardening.
- Implemented Brute-Force Protection + Keycloak (PKCE) hardening; applied OWASP Top 10 practices — resolved penetration-test findings and secured KYC document access with ownership validation.

Blockchain Compliance Research (LightBit)
• Researched blockchain compliance for the LightBit project — Stellar (SEP-10/24), VASP/FATF regulations, Travel Rule, and KYC; produced flow analysis, sequence diagrams, and documentation to support the team (research & documentation, not production implementation).

AI Multi-Agent Platform (OpenBridge)
• Built Pepper AI agent workflows for store onboarding/interview, objection handling, LINE/Facebook/Discord webhooks, Postiz publishing, and hybrid cloud/local LLM integration with Ollama.
• Improved reliability by fixing Redis race conditions, adding E2E/regression tests, and supporting provisioning and GCP migration.
Face Detection (AWS Rekognition)
• Integrated AWS Rekognition for automated face detection and verification.

Smarterware Co., Ltd., AI & Data Engineer Intern 07/2024 – 02/2025 | Nonthaburi
• Built a legal chatbot using Streamlit, AWS Bedrock, and LangChain (RAG + vector embeddings).
• Designed a Thai-language document-processing pipeline (PyThaiNLP, Transformers) with similarity & semantic search.
• Managed and optimized MongoDB & PostgreSQL; built a responsive web app.

SKY ICT Public Company Limited., Project Engineer Intern 12/2022 – 03/2023 | Bangkok
• Tested coin-operated payment and ID-card scanning modules, including functional testing, issue reporting, and verification.
• Supported CCTV facial-recognition and license-plate detection systems by validating detection results and troubleshooting software issues.
• Installed and configured CCTV control software for client environments.

EDUCATION

B.Eng. Computer Engineering & Artificial Intelligence, Panyapiwat Institute of Management 2021 – 2025
GPA 3.33

SKILLS

Programming Languages TypeScript, JavaScript, Python, SQL	Frontend Next.js, React, Vue 3, Tailwind CSS	Backend NestJS, FastAPI, Flask, Node.js, REST API Design, PostgreSQL, Redis, Prisma ORM	FinTech & Security OWASP Top 10, Keycloak, PKCE, Brute-Force Protection, KYC/AML Workflows, Multi-tenant Architecture
AI RAG, LangChain, Multi-agent Systems, Prompt Engineering, Tool Integration, Ollama, AWS Bedrock, AWS Rekognition	Cloud & DevOps AWS EC2, S3, GCP, Docker, GitHub Actions	Tools Git, GitHub, Postman, Linear, Figma	

PROJECTS

Personal Portfolio Website
Data-driven portfolio built with React, Vite, TypeScript, and Tailwind CSS; bilingual Thai/English content served from a typed data structure; deployed on Netlify.

OpenClaw, Hybrid AI Multi-Agent Framework
Explored cloud and local LLMs using Ollama; implemented multi-agent orchestration and tool invocation; compared cloud cost and local latency trade-offs. (Python, Ollama, LangChain)

Thai Legal RAG Chatbot
Retrieval-Augmented chatbot for Thai legal documents using similarity and semantic search with vector embeddings. (Streamlit, LangChain, AWS Bedrock, PyThaiNLP)
