

WITSAWA DAOCHUAI

Full-Stack Software Engineer (FinTech)

Pak Kret, Nonthaburi 11120 · (+66) 65-326-0932 · witsawa.daochui@gmail.com

OBJECTIVE

Full-Stack Software Engineer with hands-on experience building secure FinTech platforms end-to-end — Next.js/React frontends and NestJS/PostgreSQL backends. Strengths in API security (OWASP, Keycloak/PKCE), wallet & transaction systems, multi-tenant architecture, and KYC/AML integration. Also delivered production AI multi-agent systems.

WORK EXPERIENCE

Software Engineer — Enabridge Co., Ltd., Bangkok 07/2025 – Present

Tourist E-Wallet Platform (with Lightning) — Full-Stack

- Led frontend of the e-wallet back-office (top contributor) — built Partner, Wallet, KYC, Dashboard, and Fee-management modules in Next.js / TypeScript per Figma, including Keycloak (PKCE) auth flow and client-side security hardening.
- Built backend partner-management APIs (top-up / withdraw / register) in NestJS with database transactions, balance reconciliation, and fee/limit configuration.
- Developed wallet & transaction services with multi-tenant data isolation, audit logging, and unit/regression + E2E tests.
- Built KYC workflow services integrating 3 providers (document / face / sanction screening) with file validation and malicious-upload prevention.
- Implemented Brute-Force Protection + Keycloak (PKCE) hardening; applied OWASP Top 10 practices — resolved penetration-test findings and secured KYC document access with ownership validation.

Blockchain Compliance Research (LightBit)

- Researched blockchain compliance for the LightBit project — Stellar (SEP-10/24), VASP/FATF regulations, Travel Rule, and KYC; produced flow analysis, sequence diagrams, and documentation to support the team (research & documentation, not production implementation).

AI Multi-Agent Platform (OpenBridge)

- Channel integrations (LINE / Facebook / Discord webhooks), prompt engineering, and hybrid cloud/local LLM (Ollama).

Face Detection (AWS Rekognition)

- Integrated AWS Rekognition for automated face detection and verification.

AI & Data Engineer — Smarterware Co., Ltd., Nonthaburi 07/2024 – 02/2025

- Built a legal chatbot using Streamlit, AWS Bedrock (Claude), and LangChain (RAG + vector embeddings).
- Designed a Thai-language document-processing pipeline (PyThaiNLP, Transformers) with similarity & semantic search.
- Managed and optimized MongoDB & PostgreSQL; built a responsive web app.

PROJECTS

- **AI Thai Poem Writing Tool** — Flask web app for Thai poem composition; PyThaiNLP rhyme/phonetic analysis; real-time autocomplete. (Python, Flask, JS, PyThaiNLP)
- **OpenClaw — Hybrid AI Multi-Agent Framework** — explored cloud + local LLMs (Ollama); multi-agent orchestration & tool invocation; cloud-cost vs local-latency trade-offs. (Python, Ollama, LangChain)

EDUCATION

B.Eng. Computer Engineering & Artificial Intelligence — Panyapiwat Institute of Management · 2021–2025 · GPA 3.33

SKILLS

- **Languages:** TypeScript, Python, JavaScript, SQL
- **Frontend:** Next.js, React, Vue 3, Tailwind CSS
- **Backend:** NestJS, FastAPI, Flask, Node.js · REST API design · Unit Testing · PostgreSQL, Redis, Prisma ORM
- **FinTech & Security:** OWASP Top 10 · Keycloak (PKCE, custom themes) · Brute-Force Protection · KYC/AML integration · Multi-tenant architecture
- **AI:** RAG (LangChain) · Multi-agent (OpenClaw) · Prompt Engineering · Hybrid AI (Ollama) · AI-assisted dev (Claude Code, Codex, Gemini, GLM)
- **Cloud & DevOps:** AWS (Rekognition, EC2, S3, Bedrock) · Docker · GitHub Actions (CI/CD)
- **Tools & Spoken:** Git, Linear, Postman · Thai (Native), English (Intermediate)

MILITARY

Reserved Officers Training Corps (R.O.T.C.), 2018–2020.
